

GALA I - PINGÜINO EXPLORER

Naturalist Cruise
Day by day Itinerary

TUESDAY TO FRIDAY
4 DAYS - 3 NIGHTS

Tuesday: Baltra Island - Seymour Norte Island

In the afternoon you will start with the visit of:

Seymour North.- It is a low island located 30 minutes north of Baltra Island where you can observe different species of birds as the frigate, blue footed boobies and Nazca boobies, as well as seagulls, iguanas and sea lions.

Wednesday: Plazas Island - Santa Fe Island

Plazas Island.- A hike will take place where you will be able to see sea lions, Iguanas, Nazca boobies, and the famous tropical birds who have very large feathers on their tail.

Santa Fe Island.- After arriving in the afternoon, our first activity will be going to a beach where we will find sea lions, where you will be able to snorkel and see a little bit of the sea life of the place while you have fun with the sea lions; it is also possible to see Iguanas, different species of birds and sparrow hawks.

Thursday: Breeding Center Fausto Llerena- Corona del Diablo- Punta Cormorant

Santa Cruz Island (Harbour).- We will visit the Charles Darwin Station to observe giant turtles and Iguanas.

Floreana Island.

The devils crown (Corona del Diablo).- You can snorkel having the opportunity to see different species of sharks, sea lions, rays and a lot of tropical fishes.

Punta Cormorant- we will go to a beach where you will be able to see water turtles, entering the island we will reach a lagoon where you will be able to observe flamingos and different species of birds.

Friday: Dragon Hill

Dragon Hill.- A hike at a small beach will take place which we will find at the center of the island. You will have a panoramic view from the Eastern part of Santa Cruz Island where you will be able to take a glimpse at Pinzon island. At this zone it is also possible to see different species of birds.

Baltra Island.- Airport.
