PINGÜINO EXPLORER YACHT

ITINERARY B - TUESDAY TO TUESDAY

8D / 7N - DAY BY DAY PROGRAM

DAY 1 - TUESDAY

AM - ARRIVAL TO BALTRA ISLAND AIRPORT

Arrival in Baltra Island, our Guide will meet you, once the whole group is complete, will be transferred to our Yacht. The crew will welcome you on board, lunch will be served and you will have some time to prepare for your first visit.

PM - SEYMOUR ISLAND (DRY LANDING)

Seymour is located in the North, from Baltra will be 30 minutes. This place is privileged for Birdwatching, you will have the chance to see frigates, blue footed boobies, masked boobies, swallow-tailed gulls. Land and marine Iguanas, sea lions can be seen during the walking. Also from these islands we will be able to have a beautiful view of Daphne Islet.

DAY 2 - WEDNESDAY

AM - SOUTH PLAZAS ISLAND (DRY LANDING)

South Plazas Island (Dry landing) The tour starts with a walk through a landscape surrounded by Cactus Opuntia, large colonies of sea lions can be found in the shores. Land iguanas are the most representative animals in South Plaza, also this place is ideal for bird watching you can see the "pilot bird" which has a large tail with feathers, as well as Nazca Boobies and some marine iguanas.

PM - SANTA FE (WET LANDING)

Will disembark on a white sand beach and turquoise water, where you can see some sea lions resting. During the visit you can see land iguanas, the Conolophus pallidus is an endemic specie which has an attractive color, it can be found only in this Island. In Santa Fe we can also see some birds, like the Galapagos Hawk. It is an excellent place to do snorkel, the marine life is incredible in this spot, if you are lucky you will be able to see rays.

DAY 3 - THURSDAY

AM - SANTA CRUZ - PUERTO AYORA (DRY LANDING).

Santa Cruz-Puerto Ayora (Dry landing). In this day you will be able to visit the Charles Darwin Research Station and the Interpretation Center Fausto Llerena where you can see land iguanas and turtles that live in captivity for the conservation of the islands.

PM - FLOREANA - CORONA DEL DIABLO

Considered one of the best places to do snorkel, here you can see tropical fish, sea lions, rays and sharks.

Floreana - Punta Cormorant (Wet landing). This point is located at the north of the island; the beach where we disembark has a slight greenish color, similar to the Olivine, a mineral of volcanic origin. In the course of the trail, you can occasionally observe a large population of Flamingos that are around a lagoon, down the road you will observe a white sand beach, where is the nesting ground for sea turtles.

DAY 4 - FRIDAY

AM - DRAGON'S HILL (DRY LANDING)

The trail that you will be hiked starts for a small white sand beach which is delineated by black rocks that contrasts with the color of the Galapagos red crab that are sitting on the stones. While you are walking you will see a lake that is located inside the island, where occasionally we can observe endemic species such as: Flemish and other migratory birds. In this area, you will be able to spot several species of birds, as Darwin finches and mocking birds. Dragon's Hill is characterized for hosting a considerable population of land iguanas.

PM - CHINESE HAT (WET LANDING)

This islet takes its name because of its form, which resembles a Chinese Hat, when it is observed from above, it is very interesting place to view different formations of volcanic lava. You can observe some young sea lions resting on the beach and occasionally penguins can be found. Chinese Hat provides excellent conditions for snorkeling, where you will be able to find Galapagos Sharks, endemic fish, rays and much more!

DAY 5 - SATURDAY

PM - ISLET COWLEY

Snorkeling will be our activity during this day, is possible to observe white sharks, lots of reef fish, sea lions and occasionally lobsters, eels and turtles. In the eastern part of the islet you can find large stingrays and eagle rays. During the panga ride is possible to see blue-footed boobies, Nazca boobies, gulls, also sea lions and marine iguanas resting on the rocks.

PM - ISLET ALBANY

The main activity in this point will be snorkeling, especially in the Northeast, in here if you are lucky, you will be able to see eagle rays, schools of barracuda, sea lions, Galapagos sharks, sea turtles and lots of reef fish, including other open water species such as tuna or saws. During the panga ride is possible to see blue-footed and Nazca boobies, different species of gulls, marine iguanas and sea lions resting on the rocks. It is also possible to observe sea turtles raising their heads out of the water. This activity can be experienced all around the islet.

DAY 6 - SUNDAY

PM - PUERTO EGAS (WET LANDING).

It is one of the most spectacular sites that you can visit at the Galapagos, a black beach with common presence of sea lions and fur in projecting volcanic rock formations where lie tens of marine iguanas. It can be seen from the surface sea turtles swimming in the turquoise waters. It is a place that keeps part of the history of the Galapagos where there was human presence in the nineteenth century by the mining of salt.

PM - SULLIVAN BAY (DRY LANDING).

During the afternoon you will visit Sullivan Bay, in here you will see the main feature of the site, which is the impressive layers of lava, and different formations of volcanic material. It is possible to snorkel with Galapagos penguins, sea stars and goldfish.

DAY 7 - MONDAY

AM - RABIDA ISLAND

The visit of this site, will provide you with breathtaking views of the red beach and a large colonies of sea lions. On the back of the beach we will find a lagoon, where occasionally you can observe flamingos and different species of seabirds. Along the way on the trail you can see blue-footed boobies and other species of seabirds. You will be able to do some snorkeling near the beach and swim with sea turtles and different species of rays.

PM - ISLA BARTOLOME

In the afternoon you will hike to the top of the island where you can see the big and famous gable, the famous Pinnacle Rock, admiring the creation and evolution of the islands, having the opportunity of seeing fresh lava as well as penguins, sea lions, water turtles, different species of rays and tropical fishes. On the beach you can snorkel with Galapagos penguins, sea turtles, several species of rays and tropical fish. If time permits you can do a panga ride at sunset.

DAY 8 - TUESDAY

AM - ISLET MOSQUERA- BALTRA

This small island is an attractive visit site which consists of subsea lifting plates, a thick layer of white sand is the resting place of colonies of juvenile sea lions playing in the banks. You can also see gulls and migratory birds.

After this visit the guide will escort you to the Baltra airport for your return flight to the mainland.
